To begin, let us acknowledge that Queen’s University is situated on traditional Anishinaabe (Ah-nish-in-ah-bay) and Haudenosaunee (Ho-den-o-show-nee) territory. We are grateful to be able to live, learn and play on these lands.

Congratulations on your outstanding achievements and innovations! We are thrilled to share that you have qualified for the 2024 Ontario Engineering Competition, proudly hosted by Queen’s University. The Organizing Committee eagerly anticipates welcoming you to our historic campus and the vibrant city of Kingston for this prestigious event.

As you embark on a weekend filled with competition and industry networking opportunities, our commitment is to make your stay both comfortable and memorable. We encourage you to carefully review the information in this package. It contains essential details that will not only prepare you for OEC 2024 but also ensure a seamless and successful event. We look forward to an inspiring and exciting competition. See you in Kingston!
On behalf of the entire executive team, we would like to extend our congratulations for making it to the 45th Annual Ontario Engineering Competition (OEC), hosted at Queen’s University from January 26th-28th, 2024. This annual province-wide event brings together the highest ranked students from 16 different post secondary institutions across Ontario.

This competition will allow you to take what you have learned in the classroom and apply it to industry-relevant competition categories. Furthermore, the competition will give you the opportunity to network with some of the most prevalent engineering firms in Canada.

Our team has been working diligently towards making OEC 2024 a success, thinking of new and creative ways to improve your competition experience. This year, our theme, "Bridging Innovations with Tradition," serves as a powerful reminder of the dynamic interplay between cutting-edge advancements and the timeless principles that form the foundation of engineering.

We look forward to meeting you all at OEC 2024! We are confident that your participation will contribute to the success of this event and inspire a new wave of engineering excellence. This package provides a general overview of what this year’s competition will look like. If you have any questions, please feel free to reach out to either of us!

Renner Siebens

Hayley Galsworthy
I extend my warmest welcome to everyone participating in the 45th annual Ontario Engineering Competition. Smith Engineering is excited to host this at Queen’s University. I know that the Co-Chairs, Hayley Galsworthy and Renner Siebens, have been working hard with their team to bring you an exciting, challenging and fun competition weekend. I want to thank all of these student leaders for their efforts as well as the support of Engineering Deans Ontario, the Ontario Society of Professional Engineers, and all of the corporate sponsors. This three-day event aims to bring 300+ of the brightest minds in the province from 16 post secondary institutions for a weekend of innovative design while fostering an environment where students can both develop meaningful relationships while also networking professionally. This is a great opportunity for you to hone the skills that you are developing as engineering students. I am so impressed to see the variety in the nature of the competitions that students are participating in from programming, design, debate, and communications. We all recognize that professional skills are as important as technical skills in becoming the engineering graduates that we need to help solve the complex challenges facing society. I look forward to seeing you here on campus, and I wish all the participants my very best for OEC 2024!

Yours sincerely,

Kevin J. Deluzio, PhD, PEng, FCAE, FEIC
Professor and Dean
kevin.deluzio@queensu.ca
The Ontario Engineering Competition (OEC) 2024 promises to be a riveting 3-day event showcasing the acumen of over 300 of Ontario’s most gifted engineering students from 16 post-secondary institutions. This prestigious competition, now in its 45th year, creates a platform for students of various engineering disciplines and academic stages to address complex and stimulating engineering challenges. The 2024 edition is excitedly hosted by Queen’s University from January 26-28, 2024.

OEC has expanded to encompass 9 distinct categories, providing a diverse array of challenges. These categories test students' inventive abilities, technical knowledge, and problem-solving capabilities, culminating in the development of groundbreaking solutions for a panel of judges. Engagement from industry leaders is highly encouraged throughout the event, including at gala dinners, networking opportunities, and during insightful presentations.

To qualify for OEC 2024, teams must secure top positions in their home universities' qualifying rounds. The champions and runners-up of this iteration will earn their spots at the Canadian Engineering Competition (CEC), slated for February 2024 at the University of Calgary. This progression marks a significant step for those aspiring to leave an impact on the engineering landscape of Canada, and the world.
ABOUT HATCH

Forge your future

Our diverse teams build the extraordinary every day, pushing progress in ways that are most meaningful.

At Hatch, we’re not just solving the problems of today—we’re answering the challenges of tomorrow.

Let’s build positive change, together.

Visit us at hatch.com
The Ontario Society of Professional Engineers (OSPE) is Ontario's engineering advocate, representing the entire engineering community. We advocate with governments, provide member services, and offer opportunities for professional development, networking, and community building.

OSPE envisions a diverse and inclusive profession where engineers collaborate with government, industry, and academia for innovative solutions to Ontario's challenges. Our mission is to advocate for societal and engineering issues, creating opportunities for engineers and graduates to connect and contribute to their careers.

We highlight the crucial role of the engineering profession in Ontario's economic growth, environmental protection, and improved quality of life.
Red Bull Can You Make It? challenges teams of three on the adventure of a lifetime. Teams from various countries across the globe will have seven days to travel across Europe using only Red Bull as currency. They will stop at various Checkpoints and complete Adventure Challenges while vlogging their journey to share it with the world. It’s not about the first team to the destination - it’s the experiences along the way that matter. In this journey full of adventure, charm and strategy, one question rises above all: Can You Make It?
Located where the St. Lawrence River meets Lake Ontario, Kingston is a city rich in history and modern charm. Known as the "Limestone City" for its beautiful 19th-century limestone architecture, Kingston is not only a UNESCO World Heritage Destination but also a vibrant hub of culture and education. Home to Queen's University, this picturesque city offers a unique blend of old-world charm and contemporary conveniences.

As you explore the historic downtown, you'll discover a lively arts scene, eclectic dining experiences, and plenty of winter activities. Kingston's welcoming atmosphere and scenic beauty make it the perfect backdrop for innovation and collaboration during the Ontario Engineering Competition.

You can find many restaurants, cafes, and bars in downtown Kingston by taking a stroll down Princess Street. In fact, Kingston has the highest number of quality restaurants per capita of any Canadian city. Continue to Market Square in front of Kingston’s iconic city hall for a skating rink in the winter, and markets in the summer.
ABOUT KINGSTON

Kingston is centrally located between Toronto and Ottawa in eastern Ontario and is closely connected to the nearby cities such as Belleville and Brockville. You can get to Kingston by train, bus, or car by taking Highway 401. Once in Kingston, the city is easily navigated by foot, car, or using Kingston Transit.

Kingston boasts many attractions worth visiting. Popular tourist spots include Fort Henry National Historic Site, Canada’s Penitentiary Museum, and Queen’s University. There are also many scenic views along the waterfront and beautiful parks to explore around the city.

We hope you enjoy your stay in this gem of Eastern Ontario!
We want you to stay safe throughout your time in Kingston. If at any point you are concerned for your safety or need to confide to a safe authority, please know that the following resources are available to you.

Innovation meets tradition in the dynamic world of engineering. Every breakthrough is a result of a relentless cycle of designing, testing, and refining. However, our solutions often come with unintended consequences for the environment, society, and our cultural heritage. Facing these challenges, engineers are called to blend cutting-edge ideas with time-honored traditions.

This theme encourages engineers to re-examine and reinvent existing designs, considering their broader impacts. The goal is not just to find a single perfect solution, but to continuously improve, balancing innovative technology with sustainable and socially responsible practices. It's about building a future where progress and tradition coexist, driving us towards smarter, more sensitive engineering.

If any small emergencies or complaints occur during the competition, please know to make an incident report to the Incident Response Committee as soon as possible. If it is a serious emergency, please call 911 immediately.

The Incident Response System shall be a form created by the Incident Response Committee and made accessible to all delegates at an ESSCO Conference during the Conference and up to 3 days afterwards. The form shall include the following fields:

1. Name of Reporting Individual
2. School of Reporting Individual
3. Name(s) of the Individual(s) or Organization Involved in the Incident (or description(s))
4. Incident Date and Time
5. Incident Details
6. Incident Witness(es), if appropriate
7. Contact Information (Optional)
8. Whether or not the Reporter is comfortable being contacted by the IRC

More information can be found on the incident response form linked below:
Senior Design challenges competitors to create solutions to complex real-world problems. Teams must work within time constraints to design, create, and test a functional prototype. The team’s solution requires skills from a variety of engineering disciplines. Competitors finish by presenting their solutions to industry professionals from across the province.

HATCH
Junior design challenges first and second year students to solve a technical problem. Competitors must work within time and budget constraints to design, create, and test a physical prototype for their proposed solution. Then competitors will present their solutions to their peers and industry professionals.

Saturday:
- 08:00 am: Briefing (Dupuis Aud)
- 08:30 am: Design Phase (BMH Study Rooms)
- 09:00 am: Break (BMH Atrium/Workstations)
- 09:30 am: Design Phase (BMH Study Rooms)
- 10:00 am: Lunch (BMH Atrium/Workstations)
- 10:30 am: Design Phase (BMH Study Rooms)
- 11:00 am: Testing (BioSci)
- 11:30 am: Testing (BioSci)

This competition is presented by:

Bell
In the Innovative Design competition, competitors bring an independent project that they develop outside the competition, including but not limited to capstone projects. Competitors choose their own topic, prepare research, and develop a design that is innovative and addresses a void in society. Each team presents a professional presentation to a panel of judges, demonstrating the technical, social, environmental, and economic impact of their design. The competitors will be judged on the originality and creativity of their idea, the quality of their presentation, and the tenability of their design process.

**Saturday:**
- 08:00 am: Briefing (BioSci 1120)
- 08:30 am: Oral Presentations (BioSci 1120)
- 10:00 am: Lunch (BMH Atrium/Workstations)
- 01:00 pm: Engineering Society PD Workshop (Clark Hall)

**Sunday:**
- 07:30 am: Public Display Set-up (BMH Atrium)
- 08:00 am: Public Display Exhibition (BMH Atrium)
- 09:00 am: Career Fair (Rose Event Commons in Michell Hall)
Engineers often find themselves needing to explain technical processes or issues to clients, coworkers, or other professionals that do not have a background in the subject matter. As such, engineers must develop skills to effectively communicate in a matter that is easily understood. In the Communications competition, competitors are tasked with presenting complex engineering topics in an accessible way to the public. Competitors must explain an applicable process or issue of their choice, and form a coherent argument that clearly identifies social, economical, technological, and environmental impacts of the chosen topic. Judges assess accuracy, creativity, organization of their argument, and the quality and delivery of the presentation.

Saturday:

08:00 am - Briefing (Dupuis 215)

Within a designated timeframe, participants are tasked with formulating a well-reasoned and structured case on a given topic. The format of this contest mimics that of classic parliamentary debate, with debate resolutions touching on topics relevant to engineering and scientific disciplines, as well as issues that resonate with or are significant to engineers and those studying engineering. Contestants possess a comprehensive understanding of engineering principles and their societal implications, coupled with the aptitude to justify their positions swiftly and succinctly. Teams will be evaluated on the strength and clarity of their arguments, the effectiveness of their counterarguments, and their overall conduct and professionalism throughout the debate.

PEPSICO
Participants must engage in the process of re-engineering by modifying a current technology or design, with the goal of introducing additional features or augmenting its initial capabilities. As teams work on adapting an established product, they must navigate through a fresh series of limitations, all the while considering the economic implications. The proposed solutions will be assessed on their pragmatism, inventiveness, viability, and potential for commercial success.

  Re-Engineering Lead

*If you are waiting for or are finished presentations, go check out the career fair!*
In the consulting competition, competitors are presented with a large-scale engineering problem and tasked with designing a logical and detailed solution. Competitors should demonstrate consideration of the social, environmental, technological, and economic impact of their proposed solution. The final solution is presented to a judging panel, acting as the ‘client’. Each team will be judged based on an original design, an analysis and understanding of the client’s needs, and a demonstrated effort to optimize the proposed solution.

The programming competition challenges students to produce a piece of industry-level software which solves a real-world problem. The teams will use their software development skills, their technical writing abilities, and their project management skills to design the solution, which will be presented to a judging panel.

Saturday:

08:00 am  Briefing (Ellis 324)
08:30 am  Design Phase (Ellis Hall)
09:00 am  Design Phase (Ellis Hall)
09:30 am  Break (BMH Atrium/Workstations)

Career Fair (Rose Event Commons in Mitchell Hall)

Sere Otubu
Programming Lead

Mihir Gandhi
Programming Lead
The bio-engineering competition challenges competitors to design a detailed solution to a real-life biological engineering problem. Competitors must demonstrate resourcefulness while acting in good faith with the spirit of the competition. Their solution should be feasible, efficient, and fulfill the competition requirements. While the topic should challenge the competitors’ technical knowledge and skills, it should also require competitors to evaluate the economic, environmental, political, and social implications of their proposed solutions. The winning solution will be judged based on how well they are able to fulfill the defined criteria and that has the most real-word applicability and forethought.

Saturday:

08:00 am  Briefing (Kingston Hall 104)
08:30 am  Design Phase (Kingston Hall)
09:00 am  Design Phase (Kingston Hall)
09:30 am  Break (BMH Atrium/Workstations)

Check In Instructions
Registration occurs at **3:00 PM on Friday** at both the Holiday Inn and Delta Hotel. Please ensure you stick to this time so that you can be registered and checked-in before the Opening Ceremony. When you arrive, the OEC team will have a table for registration, **go to this table first.** Here you will receive your name tag and delegate welcome bag. Then, check in with the hotel, and be sure to mention you are with OEC. Room assignments will already be made upon your arrival in accordance with your preferences in the registration form. The **first person in your room will have to provide a credit card to the hotel** for any damages for the room to be applied to. There is parking available at each hotel for $30/night. Competitors are responsible for this cost. See more parking information on page 27.

What to Bring
Please be prepared for the weekend to reduce stress and focus on the competition. In addition to appropriate clothing and personal items, please refer to your individual competition’s package regarding what you need to bring versus what is supplied.
PACKING

- Laptop, charger, display adapter (if applicable for Mac users)
- Pens/pencils
- Notebooks
- USB drive
- Portable white board/dry-erase markers (limited supply provided at the competition)
- Resume/CV
- Reusable Water bottle (Queen’s is a single-use waterbottle free campus)
- Patches and swag for trading
- Appropriate clothing (See dress code below)

PARKING

Students who have a car are welcome to drive to and from campus. Parking on campus is free during the weekend, and after 5 PM on Friday. Parking is available at the lots shown here:
Throughout the competition, there will be numerous opportunities to network with industry professionals, corporate representatives, as well as other engineering students. Consequently, all competitors are expected to behave and dress in a professional way which represents their respective school.

**DRESS CODE**

**Business Casual**
- Collared shirt/blouse
- Dress pants/khakis
- Business or walking shoes

**Semi-Formal**
- Collared button shirt and tie
- Suit jacket
- Dress pants
- Skirt or dress
- Dress pants

**Ceremonies**
- **Friday Opening Ceremony:** Business casual
- **Saturday Evening Banquet:** Business casual
- **Sunday Award Ceremony:** Semi-Formal (you will have time to change after your presentations before the ceremony)

**Competitions**
- **Junior/Senior Design:** Comfortable clothing and close-toed shoes
- **Communications, Consulting, Programming, Re-Engineering, Bioengineering, Debate:** Comfortable Clothing

**Presentation Events**
You are expected to dress in business casual for your presentations!
COMMUNICATION

During the weekend, the main communication will be via Discord. Prior to arriving, please join the Discord server using the link below. Discord is available through the web, iOS, Android, Windows, and Mac. It is your responsibility to join the Discord server before the event to receive essential communication for the competition. If you are unsure how to set up a Discord account, refer to this post.

[Link to Discord]

Upon joining, please go to the rules channel as well as the roles channel to get your custom roles.

TRANSPORTATION

These services are available during your stay, and may help on arrival:

Amey’s Taxi - (613) 546-1111
- Wheelchair accessible upon request

Kingston Transit - [schedule]
- Your name tag will act as your bus pass for the weekend
- Transfer point located in downtown Kingston
- Please note that Kingston Transit does NOT accept PRESTO cards

Walking
- Each hotel is a 10-20 minute walk from each of the competition buildings
- “Walkhome” - Queen’s service where someone will come walk you to where you need to go
  - 8 PM - 3 AM every weekend, call (613)-533-WALK (9255) or visit the [Walkhome website](#)
# FOOD AND DINING

Snacks and refreshments will be provided throughout the entire weekend.

# NETWORKING

There are many opportunities during OEC to meet different industry professionals. Starting right from the Friday Opening Ceremony, you will meet some of our sponsors, other students, and planning committees. On **Saturday from 2:30 PM – 4:30 PM**, when not competing, feel free to visit the Engineering Society **Professional Development workshop at Clark Hall**.

On **Sunday**, from **8:30 AM - 11:00 AM** please visit the **Career Fair**, featuring some of our sponsors such as HATCH, PepsiCo, OSPE, BBA, and Bell!
## VENUES & LOCATIONS

1. **Dupuis Hall** - 19 Division St, Kingston
2. **Biosciences Complex** - 116 Barrie St, Kingston
3. **Beamish-Munro Hall (BMH)** - 45 Union St, Kingston
4. **Mitchell Hall** - 69 Union St, Kingston
5. **Ellis Hall** - 58 University Ave, Kingston
6. **Kingston Hall** - 103 Stuart St, Kingston
7. **Clark Hall** - 30 5 Company Ln, Kingston

*Click on the name of each building to see the floorplan*
COMPETITIONS

JUNIOR DESIGN
First and second-year students design creative solutions to real-world engineering problems, presenting practical solutions within time and resource constraints.

DEBATE
Students develop and present arguments for or against an impromptu resolution, engaging in multiple rounds of logic and rhetoric-based debate.

COMMUNICATIONS
Competitors explain the social, economic, technological, and environmental impacts of complex engineering topics in understandable terms.

RE-ENGINEERING
Engineering students redesign existing solutions to improve performance, utilizing diverse skillsets.
**SENIOR DESIGN**
Participants use multidisciplinary knowledge to design technical solutions to advanced engineering problems, presenting functional solutions under resource constraints.

**INNOVATIVE DESIGN**
Students develop and present arguments for or against an impromptu resolution, engaging in multiple rounds of logic and rhetoric-based debate.

**PROGRAMMING**
Teams code software solutions for complex computational challenges, focusing on execution time, correctness, and overall performance.

**CONSULTING**
Competitors develop and present detailed solutions to multidimensional engineering challenges, demonstrating understanding of various impacts.

**BIO-ENGINEERING**
Students are tasked with using core engineering principles to develop solutions to bio-engineering problems based on provided narratives with complications.
ONTARIO ENGINEERING COMPETITION
EXECUTIVE TEAM 2024

GRAPHICS
- Kayla MacKenzie, VP Graphic Design
- Sophie Goodman, VP Graphic Design

TECHNICAL
- Sabrina Button, VP Technical
- Keven Li, Webmaster

COMPETITIONS
- Mikayla Perrin, VP Competitions
- Charlotte Murat, VP Competitions

LOGISTICS
- Lobsang Wangkhang, VP Logistics
- Ali Bekheet, VP Logistics

SPONSORSHIP
- Stephanie Gilmour, VP Sponsorship
- Maya Fijalkowski, Sponsorship Coordinator

COMMUNICATIONS
- Camille Miller, Sponsorship Coordinator
- Oliver Morrow, VP Communications

MARKETING
- Maahum Khan, Marketing Coordinator
- Alice Stapleton, Marketing Coordinator

FINANCE
- Emilie Robidas-Stephan, VP Finance

THANK YOU TO ALL OF OUR SPONSORS!
THANK YOU!

We are so excited to welcome you to Queen’s and host OEC 2024! We hope the competition is an opportunity for you to learn, play, and grow. We are truly grateful for your interest and participation in OEC, and we hope you gain new skills, knowledge, and interests throughout the event that you can apply to your studies, and career.
